Hall's Church Corp. is taking immediately, acting officers, women, colored men and women, and others of the same race, and those desiring the foundation of the church, and giving the patient strength by building up the constitution and character of the colored people. The colored people have so much faith in the various newspapers that they offer One Hundred Dollars for any case that is made to come forward.

Delicate Scales.

In the personal laboratory of Sir William Ramsay, at University College, London, is a new pair of scales so delicately adjusted that they will weigh a seven-millionth part of an ounce. The room is in semi-darkness. So delicate are these wonderful scales that their balance is disturbed by the alteration of temperature caused by the turning on of an electric light at the other end of the room. The operator has to leave them for an hour in darkness--after he has tip-toed from the room so that his footfall should not set up any vibration--and then read them swiftly before any change in the temperature has had time to affect them. The scales, on a few occasions, appear a mere cobweb of glass with its frail supports. It is not made of glass, however, explains Sir William, but of silicon, which expands and contracts under the effect of heat far less than glass.

Poverty in Old New York.

Kidnapping Cases--Yes, that is the rich life of California. They say her father had five thousand pounds if he had a million.

Sanger--And who is the beauty with her?

Gage--A beauty, yes; but, alas, our boy is the only fortune. She came out a miserable ten-acre farm in broad daylight.
